

Výsledky RP MEFANET 2009 na 3.LF UK v Praze

Kvašňák, E.

At the Third Medical Faculty of Charles University in Prague, thanks to the Centralized developmental project MEFANET 2009, we have established and worked out number of essential tools and administrative frames as well as series of electronic educational materials. We built up environment and have started a number of promising electronic educational materials in field of Anatomy, Orthopedics and Traumatology, Stomatology and Biophysics. We succeeded to wake up our teachers – they know what for example the e-learning is, they are aware of pros and cons of electronic / distal learning, see the advantage of using it and they want to know how to prepare it and use it. In field of electronic education our teacher should be motivated and helped - so that is in brief what we have done and what we plan to do. We realized almost all we planned, so we go on.
