⁵ Charles University in Prague, 2nd Medical Faculty

Abstract
E-klinická biochemie (Project No.: CZ.1.07/2.2.00/15.0048) is 3 years lasting project (start 1.2.2011) that deals with pregradual education of clinical biochemistry on medical faculties. The main goal of the project is to create a common e-learning textbook (e-book) and course for clinical biochemistry.

Key words: E-klinická biochemie, Clinical Biochemistry, e-learning, colaboration, Moodle MEFANET

Article in the conference proceedings
E-klinická biochemie (Project No.: CZ.1.07/2.2.00/15.0048) is 3 years lasting project (start 1.2.2011) that deals with pregradual education of clinical biochemistry on medical faculties. Official partners in the project are Medical Faculties of: Charles University in Prague, Medical Faculty in Pilsen; Masaryk University in Brno and University of Ostrava. However, also authors from 1st and 2nd Medical Faculty, Charles University in Prague participate on this significantly project. E-klinická biochemie has 3 main goals:

* education of authors in new possibilities, ways and tools for e-learning authoring

* creation of common e-learning textbook (e-book) and course for clinical biochemistry (esp. for support of traditional teaching)

* start of a long-term colaboration and creation of pedagogic teams across all participating universities

You can find informational pages (dedicated esp. for project management)) on http://ebio.biochemik.org, educational content is being created in Google Documents and in the next phase also in the Moodle MEFANETu (https://moodlemefanet.cuni.cz/) and several other tools (e.g. Adobe Presenter). In the presentation, we focus on several tools for management of the project nad for training of authors (e.g. on-line videoconferences), our experience with cooperation in Google Documents and our vision of teaching in Moodle MEFANET.
